Important Please Note

1. This is a current estimate only, based on the details entered. The amount of VRT due at registration may differ from the estimate, if the details entered do not match the vehicle exactly. The VRT amount due could also differ if there is a change in the OMSP of the vehicle, if a different rate of CO₂ or NOx emissions applies, or in the event of a legislative change.
2. An appointment for a pre-registration examination of the vehicle must be made with the NCTS within 7 days of the vehicle entering the State. Registration must be completed within 30 days of the vehicle entering the State.

For more information on booking NCTS appointments, see www.ncts.ie/vrt.

3. When purchasing a vehicle please ensure you get all the correct documentation. Please also give yourself plenty of time to register the vehicle within the required 30 days. You will incur additional charges if the vehicle entered the State more than 30 days before registration.
4. This calculator works on the basis that the vehicle is in good condition considering its age, and within mileage norms. Additional VRT may be payable if the vehicle is fitted with chargeable enhancements/accessories, otherwise known as 'extras'.
5. In certain circumstances, Customs Duty and VAT may also be payable. For VAT purposes a vehicle is a 'new means of transport' when it is less than 6 months old or has travel less than 6,000km. [Click here](#) for more information.
6. A Certificate of Conformity or other Type Approval certification is required for previously unregistered vehicles.
